STATE INDUSTRIAL ACCESS ROAD

TO SERVE

Mars Petcare

Town of Thompson's Station Williamson County, Tennessee

PREPARED BY

TENNESSEE DEPARTMENT OF TRANSPORTATION PROJECT MANAGEMENT DIVISION

Revised May 21, 2015

INTRODUCTION AND LOCATION

The Town of Thompson's Station in Williamson County has submitted an application to the Tennessee Department of Transportation (TDOT) requesting assistance in providing access to serve Mars Petcare, which is constructing a Research & Development (R&D) facility for their Phase 1 development in the southeast corner of the SR-840/SR-6 (US-31, Columbia Pike) intersection and sometime in the not too distant future they will proceed with Phase 2 to construct a new headquarters facility adjacent to the R&D facility that will employ 1200. This new R&D facility will develop and test new pet foods. During Phase 1 the industry plans to invest \$90 million in land, construction and equipment that will employ 144 with an average annual payroll of \$9,962,035. The plant will be served by approximately 4 heavy trucks per day, but multiple smaller delivery trucks will be coming in and out through the day.

PROPOSED IMPROVEMENT AND COST

The proposed improvement will consist of extending the 5-lane section of SR-6 for approximately 2,040 feet south of SR-840, then begin tapering down another 1,210 feet to the existing 2-lane section. Incorporated within these limits will be the access opening for Critz Lane, which will be re-aligned by Thompson Station. The project will include grading, base, drainage, paving, guardrail, signage, and pavement markings for access to the Mars Petcare R&D facility in their Phase 1 and their inevitable Phase 2. If warranted, a signal at the re-aligned Critz Lane intersection can be installed through the TDOT Spot Safety Program

Every attempt will be made to avoid the box culvert under SR-6; however, the Town has asked that the Department look at adding an additional box to accommodate a pedestrian passage to connect their greenway. They will be responsible for the cost and it will be added to the final TDOT construction estimate as a non-participating item. The entrance to the new facility will need to have a warrant study to provide a signal at this location, but their main concern will be at their Phase 2 entrance with 1200 employees trying to get in and out. As stated earlier, a warrant study will also be required at the re-aligned intersection at Critz to determine if a signal will be installed.

The roadway base and surface is proposed to consist of 10 inches of stone base, 3 inches of "A" mix, 2 inches of "B-M2" mix, and 1.25 inches of "D" mix. All of the project improvements will be on SR 6; therefore TDOT has agreed to cover all project costs: preliminary engineering, right-of-way and construction. The location of existing Utilities on Private Easement has been identified and every attempt to avoid them will be made to reduce cost.

The estimated costs for this project are as follows:

TOTAL Estimated Project Cost	\$5,330,961
Non-participating cost of underpass	\$279,900
Contingency/Inflation (10% of const. estimate)	\$169,000
Construction	\$1,690,000
Utilities	\$297,228
Right-of-Way	\$2,523,033
Preliminary Engineering	\$371,800

ECONOMIC ANALYSIS

As an indicator of the economic feasibility of this proposal, a benefit cost ratio was calculated. This ratio is a comparison of monetary benefit of project to the cost of the project, expressed in present value. The benefit is estimated from projected sales tax revenue generated by the added jobs and the actual property and personal taxes that will be collected on the capital investment over a period of 10 years. The cost is the sum of the estimated project cost and the present value of the annual maintenance over 10 years.

This ratio was found to be 1.81 to 1, which indicates that the proposal is sound from an economic standpoint.

RESOLUTION NO. 2015-010

A RESOLUTION OF THE TOWN OF THOMPSON'S STATION, TENNESSEE TO APPROVE AN AGREEMENT WITH ENVIRONETICS, INC. FOR THE PURCHASE AND INSTALLATION OF A FLOATING BAFFLE SYSTEM AND TO AUTHORIZE THE MAYOR TO EXECUTE SAID AGREEMENT.

WHEREAS, the Town has advertised request for proposals for a floating baffle system for its regional wastewater treatment system with certain specified attachments (the "Equipment"); and

WHEREAS, the Town did not receive any responses to its request for proposal, but previously received a proposal from Environetics, Inc.; and

WHEREAS, the Board of Mayor and Aldermen has determined that it is in the best interest of the Town to enter into an agreement with Environetics, Inc. to purchase the Equipment as more particularly described in the contract attached hereto for the amount of Thirty-eight Thousand Nine Hundred and Fifty Dollars (\$38,950.00), and to authorize the Mayor to sign said agreement.

NOW, THEREFORE, BE IT RESOLVED by the Board of Mayor and Aldermen of the Town of Thompson's Station as follows:

That the Contract between the Town of Thompson's Station and Environetics, Inc. is approved and that the Mayor is hereby authorized to execute said Agreement on behalf of the Town.
